

WELL SEALS

DIFFERENT MATERIALS

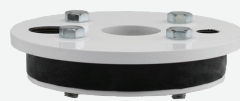

ABS

lightweight, durable and corrosion resistant making installation or maintenance more efficient.

CAST IRON

Cast iron seals offer durability and strength

STEEL

Provides excellent structural support for demanding applications

UPSELL OPPORTUNITIES

Well Seal Elbows

Used for making connections at the top of a well seal when using poly pipe

Venturi Adapters

Should be used anytime a deep well jet pump is being installed

Heat Shrink Kits/Cable Guards

If installing a submersible pipe

Corrosion Resistant Options

Stainless steel or bronze fittings

SPLIT AND SOLID SEALS

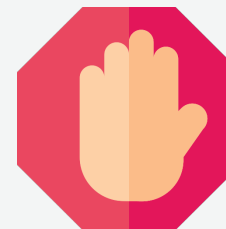

Having a split plate well seals allows the contractor to bend the seal to get it loose and up out of the casing. This makes them easier to remove from the well casing if you need to service or repair the pump.

CUSTOMER OBJECTIONS

"A cheaper seal does the same thing."

Features like:

- half-thread bolts
- precise hole alignment
- thicker gaskets

BOSHART FEATURES

- Clearance for couplings
- Clearance for bolts
- Positive seal around bolts
- Hole alignment protects pump cables
- Larger conduit tapings
- High quality gaskets
- Coupling supports
- Welded eye bolts
